X-Arcade

The Ultimate Arcade Gaming Experience

Built like a friggin' tank!

Flimsy plastic is swell for Tupperware and skirt hangers but shouldn't you be demanding MORE from your game controller?

Since the genesis of gaming, gamers have paid premium dollars only to get lackluster, poorly designed cheapo plastic game pads, joysticks, and keyboards in return.

But that was yesterday...

Every molecule of your X-Arcade™ product is constructed with industrial grade materials, no dollar store plastic. It literally feels like an arcade game machine.

And each X-Arcade™ product is meticulously engineered and designed to endure the roughest rides. In other words, you don't have to treat your X-Arcade™ Game controller like a delicate newborn baby girl.

Yank back on the joystick and mash away at the fire button. Get lost in the rush of the game just like you would at the arcade.

It's ok, be your crazy-uninhibited-gaming-self, X-Arcade™ was built to handle it.

Putting Our Money Where Our Joystick Is.

XGAMING doesn't settle and neither should you. But you don't have to take our word for it, we cover your X-Arcade™ product with a lifetime warranty; the only warranty of it's kind in the game industry.

Not only does XGAMING cover your X-Arcade™ for the entire life of the purchaser, XGAMING pays all fees and charges for shipping to/from your location (USA ONLY).

"You have to see this device to believe it."

"It's huge and built like the proverbial brick outhouse—indestructible. It gets my highest recommendation."

X-Arcade

The Ultimate Arcade Gaming Experience

Reliving Thousands Of Arcade Classics

Bring The Nostalgia Of The Real Arcade Into Your Home.

The X-Arcade™ was designed by Arcade Enthusiasts, true lovers of the classic arcade experience. The X-Arcade™ Joystick included in the bundle is modeled from a real arcade panel.

The games you can play are the original, authentic arcade games you played in the 70's, 80's and 90's.

Games Like...

Ms. Pac-Man™, Space Invaders™, Robotron™, Galaga™, Donkey Kong™, Street Fighter™, Mortal Kombat™, Killer Instinct™, Gauntlet™, Tetris™, 1942™, Asteroids™, Tron™, Centipede™, Karate Champ™, Joust™, Gyruss™, Missile Command™, Scramble™, Track and Field™, Zaxxon™, Paperboy™, Star Wars™ and over 3,000 more.

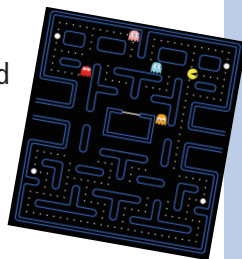

How do I play the classics?

MAME; an open source project started in 1996, gave birth to the cultural phenomenon of reliving arcade classics on your PC/MAC. MAME allows everyone to enjoy long-lost arcade games.

The simplicity these games in their original form can create more enjoyment than new generation games from older entertainment seekers.

Cheesy music, poor graphics, fun game play; add up to one thing: Nostalgia. Something as small as the music of a classic arcade game (thinking Dig-Dug™ or Pac-Man™) can instantly take you back in time.

If you enjoyed these games in arcades: with your X-Arcade and MAME Software you can return to your youth, a simpler place and time in the world. If only for a game or two, relive those simple times today.
